

Product owner

Toulouse (or Paris), full time, Starting date: ASAP

ALTEIA:

ALTEIA provides tremendous career opportunities to professionals who are willing to work hard, on meaningful challenges alongside a talented team.

By joining Alteia, you'll participate in the transformation of key industry sectors that are increasingly relying on imagery and artificial intelligence to drive their businesses. You'll have a unique chance to shape and implement your ideas as part of a leading, fast-growing and cutting-edge company! You will be surrounded by professionals who have all an exceptional background and amazing stories.

We encourage out-of-the box ideas and incentivize our teams to develop their creativity. Alteia can give you a unique opportunity to gain valuable and challenging experience in a fast growing business with passionate and easy-going enthusiastic people.

It is in technical excellence and perpetual innovation that we recognize ourselves.

The product

The ALTEIA Platform is the cloud-based solution that enables enterprises to:

- Rapidly and flexibly access and prepare gigabytes of visual data (images, point clouds, videos ...) with prebuilt annotation / labeling tools.
- Build and manage A.I models without writing code using an intuitive user interface.
- Deploy applications within weeks with customizable validation processes and continuous improvement workflows
- Drive company-wide results by seamlessly publishing predictive insights to enterprise systems or custom business application

Your missions

As part of the Product team, under the responsibility of the Product owner lead, your role will be to contribute to the development of the Alteia platform in an agile approach. As such, it involves the expected responsibilities of a product owner

- New feature and module development- Implementing the product roadmap for specific features
 - Collection of needs from users and stakeholders
 - Design of the solution in relations with the UX/UI designers and the dev team
 - Tests and validation
 - Backlog management
 - Risk and opportunities management
- Maintenance and operations
 - Contribution to Level 2 support through rotating on-call duties
 - Contribution to communication material toward internal teams and partners

As the company is evolving at a fast pace in a complex and demanding environment, you'll have to

- Challenge and improve your practices
- Suggest and contribute to process updates within the team and the company

Your profile

ATTRIBUTES

- Committed
- Rigorous
- Autonomous
- Persistent for the purpose of succeeding
